EDUCATION

Western Governors University

Bachelor of Science in Computer Science

Utah, United States

Feb. 2025 – July 2026

Universidad Catolica Boliviana

Bachelor's Degree — Transferred to B.S. Computer Science WGU

La Paz, Bolivia

Feb. 2022 – Sep 2024

EXPERIENCE

Technical Support & Infrastructure

June 2025 – Oct 2025

ROYLIS S.R.L

La Paz, Bolivia

- Mentored by a senior developer, learned to maintain and support a small on-premise private database, handling SQL queries and requests while helping implement data redundancy practices to protect critical business information.
- Developed a pricing calculator using Spring Boot for the backend and SQL for real-time data retrieval. Followed an Agile workflow by building features from assigned user stories, moving them through a testing and review queue, and incorporating feedback before final approval from the Product Owner for deployment.
- Built API connections between the SQL database and an internal dashboard used by the accounting team, enabling them to review and approve or deny purchase requests
- Resolved internal team login and account access issues, troubleshooting authentication problems to restore user access quickly.

IT Systems & Support Associate

May. 2024 – Sep. 2024

Milicom

La Paz, Bolivia

- Tested API integrations and system deployments using Postman in an Agile environment, validating expected responses/status codes, logging defects in Jira, and reproducing issues for QA to accelerate bug resolution.
- Integrated WhatsApp Business API with AI tokens to automate customer support conversations, reducing manual ticket volume and cutting operational costs for the support team.
- Collaborated with a support team to develop backend logic that delivered default responses when AI API token limits were reached or calls timed out, ensuring uninterrupted customer service continuity, and configured push notification alerts to inform support agents of real-time ticket status changes.
- Performed hands-on network cabling and hardware setup, terminating raw RJ45 connectors using a crimping tool (T568A/B wiring standards) to connect printers and PCs to network switches.

CERTIFICATIONS

LPI Linux Essentials: Obtained Feb 2026 (Lifetime certification)

ITIL 4 Foundation (Axelos): Obtained Mar 2026 (Expires Mar 2029)

CompTIA A+ (Sponsored by Amazon): Expected Oct 2026

PROJECTS

Secure Document Access Portal | *React, Node.js, Firebase, PostgreSQL, Vercel, Railway*

2025

- Built a full-stack web app (React front-end, Node.js backend) with Firebase Authentication for allowlist-only login, deployed via Vercel and Railway
- Implemented device fingerprinting to bind sessions to a single device, plus screenshot-detection and a read-only PDF viewer to prevent content redistribution

TECHNICAL SKILLS

Languages: Java, NoSQL(MongoDB) , Python, C/C++, SQL (Postgres), JavaScript, TypeScript, CSS

Operating System: Windows, Linux (Ubuntu), macOS, VMs/Virtualization

Frameworks: React, Spring Boot, Node.js, Vue, MVC, JUnit, Angular, Express.js, FastAPI

Troubleshooting & Network: TCP/IP, DNS/DHC basics, REST APIs, Ticketing System, Hardware Diagnostics

Developer Tools: Git, Firebase, Docker, Google Cloud Platform, VS Code, SEO, Visual Studio, PyCharm, Figma, Claude Code, Copilot

Libraries: pandas, NumPy, Matplotlib, scikit-learn
